ELEKTRİK ELEKTRONİK MALZ. SAN. VE TİC. LTD. ŞTİ.

Gyros

Tamagawa Seiki has a long history of gyro production; in 1942 we started developing and manufacturing gyros for aircraft.

During this time, we have introduced a great variety of gyros used mainly for motion control applications in the fields of defense, aircraft and ships.

In recent years, our mechanical gyros, gas rate sensors., optical fiber gyros and many devices applying their principles are making their way into the general industrial area, such as automatic guided vehicles, FA, construction and public works, as well as into aircraft and ships.
